Suture free securement for medical catheters and drains

SWIFT • SECURE • SUTURE FREE
The latest innovation in catheter securement

SAVE TIME
- Braidlocks’ universal approach is designed to create a culture of interdisciplinary collaboration, standardising catheter and tube securement procedures, enabling improved time efficiency for healthcare workers
- Braidlocks’ easy-to-use adjustable technology, provides caregivers the opportunity to spend more time with patients
- Improved stability reducing pistoning and micro-movement at exit site may improve healing time

SAVE MONEY
- Designed to optimise catheter dwell times, may reduce potential catheter related bloodstream infection (CRBSI) average cost
- Designed to minimise interruptions to treatments, reduce associated costs resulting from multiple restarts and catheter replacement and reduce extended hospital admissions
- Economic benefits, using Braidlock® enables healthcare providers to rationalise product purchases and inventory holding

SAVE LIVES
The EU Directive 2010/32/EU1 is aimed at employers, requiring them to make appropriate provisions for healthcare workers in respect of the risk of sharps injuries.
- Braidlock® is designed to comply with safety standards, improving healthcare worker and patient safety, minimising complications associated to suturing and prevent needlestick injury
- Designed to minimise catheter dislodgement and associated complications
- Designed to improve clinical outcomes and reduce variability in patient care

---

BRAIDLOCK CHEVRON

Braidlock® devices revolutionise percutaneous catheter securement, removing the need for suturing. They are designed to improve clinical outcomes, improve economic effectiveness, and improve quality of care and patient experience.

BRAIDLOCK® NG

Nasogastric tubes form an integral part of surgical management and have a variety of therapeutic uses. It is important to choose a securement device that provides comfortable tube securement and reduces associated morbidities with NG tube placement.

FINANCIAL IMPLICATIONS OF TUBE REPLACEMENT

Tube replacement is expensive and impacts clinician time and productivity. Studies suggest the incidence of accidental nasogastric tube dislodgement exceeds 40%.

BENEFITS OF USING BRAIDLOCK®

- Designed to reduce nasogastric and feeding tube dislodgement and associated complications
- Designed to improve nasogastric and feeding tube dwell times
- Braidlock® NG firmly grips the tube without occluding the lumen or compromising flow
- Unique design means no sticky residue on the tube
- Skin-friendly hypoallergenic dressing leaves very little residue on patient’s skin
- Positioning on the cheek provides clear view of the tube position in the nostril
- The chevron design and shape of the dressing provides excellent tube stabilisation

How it works

1. **Compress**
2. **Insert**
3. **Release**
ADVANCED SECUREMENT FOR PERIPHERAL IV CATHETERS WITH INTEGRATED BRAIDLOCK® SECUREMENT

EASIFLO
EasiFlo with Braidlock® provides added security for your IV lines.

EasiFlo is an admin set used for the delivery of low risk, non-viscous clear infusions. It is simple to install and delivers your infusions with a graduated flow rate of 5-250ml per hour with an accuracy of +/- 10%.

The Flow Regulator is a two-handed operation offering security and its silicone joint allows for continuous and precise flow control.

PRECAUTIONS
- The Flow Rate should be verified by drop counting
- The regulator has been calibrated for normal parenteral solutions. It should not be used with blood, blood products or glucose solutions above 10% or lipid emulsions

BRAIDLOCK® IV EXTENSION SET WITH NEEDLE-FREE SWABABLE VALVE
Braidlock® IV extension set with swabable needle-free access is designed to reduce catheter related complications and improve patient comfort.
